RECOMMENDATIONS

Jessica Englund - Director, Visual Design, Hanson, Inc

"I've had the opportunity to work with Joe in various capacities during my time at Hanson. A diligent, hard worker, Joe easily crosses borders from visual design to front-end development. His work was always very creative, yet analytical and remarkably impeccable. Joe also does a great job of staying abreast of new and emerging trends in technology. Great wit, just a general pleasure to be around."

Nate Riggs - Ecommerce,Inc. Client

"When I worked out an affiliate agreement with Ecommerce Inc., I was looking to switch hosting providers for my blog. At the time, I had no idea that the company was dabbling in offering web design and development for bloggers, small business owners and the like. When I did find out, I was still skeptical at best. I'm pretty picky when it comes to my blog, and right so. it's the hub of everything I do as a professional. Needless to say, I don't trust just anyone. Then I met with Joe Payton and an old friend, Mike Harris about this new project they were working on - Inline Bits. I had heard Joe's name around Columbus, usually followed by the words "Web design guru" or "creative genius". I know now why Joe has that reputation. From soup to nuts, he designed and developed NateRiggs.com, sticking closely to my strategy and instructions, but also bringing in his own killer creative talent and raw experience in open source development. Joe made the process easy, even working on the weekends to get this thing up. I should add that Joe is also the father of three young kids, and as a dad myself, I know how important weekend time is. All said and done, I couldn't be happier. NateRiggs.com is even cooler than I envisioned, and Joe was the driving force behind making it happen. I strongly recommend him as a designer/developer and as a great person to work with..."
